

The presentation session was marked by the round table "Blue Project, a more sustainable future", where the partners made a commitment to work together to combat food waste and enhance the value of fish from the Portuguese coast.

BLUE PROJECT LAUNCHED IN JANUARY 18TH

A necessary response to the urgency of sustainability

João Ribeiro, Guimarpeixe

Guimarpeixe was born within the industrial culture of Guimarães, founded on strong foundations and dedicated to the industry and commercialization of deep-frozen products, among which the most varied species of fish stand out. It meets the highest market demands, both in terms of installations and equipment, with the best industrial units in the country in this field. [Read more](#)

Upcoming activities

Promoting a culture of disseminating knowledge to society, the next activity will be marked by the launch of this project's website.

This platform will be the central communication tool, and will aggregate information about all Blue Project initiatives and results.
